

Based on both of my work samples above I notice some areas for growth along with some areas for improvement. I noticed an improvement in my disfluent pausing. I also noticed an improvement in using complete sentences that do not start off with filler words. Another skill that I have gained in my time in practicum is my confidence. I sound very confident in what I'm voicing which will gain more trust between the deaf and hearing consumers. One thing I noticed that I can improve upon is expressing dialogue in a more idiomatic English phrasing. In my interpretation the dialogue does not sound idiomatic. That is one skill that I am going to continue to practice as an interpreter.
