

Based on both of my work samples I notice some areas of growth along with some areas of improvement. I did notice that in my second sample the amount of times I started off my sentences with filler words had been improved upon. In my second sample, I noted some disfluent pausing. One of my goals for practicum II is increasing my processing time. This will help me get a bigger picture before voicing and prevent the disfluent pausing. I also want to keep working towards the use of complex sentences. To help me practice with complex sentences I plan to work on activities outside of practicum. I'm hoping to continue to grow my voicing skills in practicum II.
